NOTES FOR THE GUIDANCE OF AUTHORS

General : *Proceedings* are published annually, and the material submitted for publication must be in the hands of the editor by December 1st each year. Papers are accepted on the understanding that they have not been submitted or published elsewhere, and become the copyright of the Isle of Wight Natural History and Archaeological Society.

Papers on all topics within the range of interests of the Society are welcomed. Papers submitted for publication should not exceed 8,000 words in length. Longer papers may be published under special circumstances but it is advisable to consult the editor before submission. Manuscripts must be typed, double spaced, on one side of A4 paper only and with good margins; alternatively, and by arrangement with the Editor, texts may be submitted in machine readable form on computer diskette. Text intended to be printed emphasised should be underscored. Underscore will not normally be used per se in the *Proceedings*. Scripts must be accurate and in their final format because corrections at the proof stage are expensive. Additions at the proof stage will not be permitted.

Title : brief and specific

Abstract : an intelligible summary of the paper in not more than 200 words (this is not necessary for short notes and papers).

Main body of paper : subdivided into headed sections where appropriate.

References or bibliography : see below.

Tables : each typed on a separate sheet

Legends : for text figure and/or photographic plates.

Measurements: All measurements should be given in metric (SI) units. Where referring to measurements in older literature, imperial values may also be quoted.

Illustrations : Send only photocopied initially. Maximum size for illustrations published in the *Proceedings* is 203 x 135mm, including captions and legends at foot. Master drawings should be prepared at not less than twice final size. Authors are responsible for labels on drawings which should be in Helvetica or Univers at 10 point final size. Unsuitable drawings will be returned.

References : All references mentioned in the text should be listed by author and arranged in alphabetical order at the end of the paper in the form used in the current volume of the *Proceedings*. Where a paper has two authors their names should be linked by an ampersand (&). If there are three or more authors the name of the first author should be followed by 'et al'. Journal titles should either be given in full or abbreviated in accordance to the World List of Scientific Periodicals (4th edition 1963 - 5).

Copyright material : Authors should note that they are solely responsible for copyright clearance for any reproduced or partly reproduced material, particularly where Governmental organisations might be concerned.

Proofs : When in due course the author receives proofs of the paper, these should be checked and returned to the editor with essential corrections unambiguously marked. Prompt attention to proofs is essential since any delay at this stage will hold up publication.

Contents

Editorial	7
Obituary	9
L. Snow : Provisional Atlas of the Bryophytes of the Isle of Wight :	
Mosses - Amendments	11
